3D Printing & Design

## education

- 2018-2020 **Master's** candidate in Business Administration West Chester University, PA  
*Focus in Project Management*
- 2013-2017 **B.S.** in Electrical & Computer Engineering Rutgers University, NJ  
*Class of 2017, Cum Laude*

## experience

- Since 2018 **Computer Programmer** Wakefern Food Corp.  
*Code, test, and debug new software. Perform activities associated with program, mobile, and web development, from application design through implementation. Works independently and as a member of a project team.*
- Since 2018 **Software Engineer** BizNeedsTechNow  
*Develop elegant and responsive web applications for clients. Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions*
- 2015-2018 **Leader in Technical Training / Associate Programmer** Wakefern Food Corp.  
*Coded, tested, and debugged new software. Engaged in a fast paced and a dynamic business environment throughout a 24-month program. Exposed to diverse aspects of the business, and participate in group projects designed to improve business operations. Interface with company executives and store owners and giving presentations on technologies being developed*
- 2014-2016 **Business Development Intern** Course Hero Inc.  
*Develop and implement marketing, communication, and business development strategies to drive visibility of the Course Hero Knowledge Drive, a philanthropic initiative. Recruit, manage, and lead a team of 20+ students to help strengthen the academic resource that Course Hero provides*

## projects

- 2018 **Freelance Web Development** RussEps.com  
Worked independently and with BizNeedsTechNow to design and develop websites for small businesses. Examples can be found on **RussEps.com**
- 2018 **Recurring Payments on Payment Gateway** shoprite.com  
Securely stored customer's encrypted credit card tokens for express checkout
- 2018 **Fuel Loyalty System**  
Developed a web service that utilizes a discount system for Loyalty customers based on the amount of money spent in stores
- 2018 **Mobile Override Manager (M.O.M) & Direct Alert Distributor (D.A.D)**  
Communication applications for employees to improve efficiency
- 2017 **Automated Pill Dispenser** Rutgers Capstone  
Used Arduino and 3D printing technologies to build an automated pill dispensing system for users who need assistance keeping track of their medication
